Now more than ever: Aldous Huxley's enduring masterwork must be read and understood by anyone concerned with preserving the human spirit "A masterpiece. . . . One of the most prophetic dystopian works." —Wall Street Journal Aldous Huxley's profoundly important classic of world literature, *Brave New World* is a searching vision of an unequal, technologically-advanced future where humans are genetically bred, socially indoctrinated, and pharmaceutically anesthetized to passively uphold an authoritarian ruling order—all at the cost of our freedom, full humanity, and perhaps also our souls. "A genius [who] who spent his life decrying the onward march of the Machine" (*The New Yorker*), Huxley was a man of incomparable talents: equally an artist, a spiritual seeker, and one of history's keenest observers of human nature and civilization. *Brave New World*, his masterpiece, has enthralled and terrified millions of readers, and retains its urgent relevance to this day as both a warning to be heeded as we head into tomorrow and as a thought-provoking, satisfying work of literature. Written in the shadow of the rise of fascism during the 1930s, *Brave New World* likewise speaks to a 21st-century world dominated by mass-entertainment, technology, medicine and pharmaceuticals, the arts of persuasion, and the hidden influence of elites.

"This is the management book of the year. Clear, powerful and urgent, it's a must read for anyone who cares about where they work and how they work." –Seth Godin, author of This is Marketing "This book is a breath of fresh air. Read it now, and make sure your boss does too." –Adam Grant, New York Times bestselling author of Give and Take, Originals, and Option B with Sheryl Sandberg When fast-scaling startups and global organizations get stuck, they call Aaron Dignan. In this book, he reveals his proven approach for eliminating red tape, dissolving bureaucracy, and doing the best work of your life. He's found that nearly everyone, from Wall Street to Silicon Valley, points to the same frustrations: lack of trust, bottlenecks in decision making, siloed functions and teams, meeting and email overload, tiresome budgeting, short-term thinking, and more. Is there any hope for a solution? Haven't countless business gurus promised the answer, yet changed almost nothing about the way we work? That's because we fail to recognize that organizations aren't machines to be predicted and controlled. They're complex human systems full of potential waiting to be released. Dignan says you can't fix a team, department, or organization by tinkering around the edges. Over the years, he has helped his clients completely reinvent their operating systems—the fundamental principles and practices that shape their culture—with extraordinary success. Imagine a bank that abandoned traditional budgeting, only to outperform its competition for decades. An appliance manufacturer that divided itself into 2,000 autonomous teams, resulting not in chaos but rapid growth. A healthcare provider with an HQ of just 50 people supporting over 14,000 people in the field—that is named the "best place to work" year after year. And even a team that saved \$3 million per year by cancelling one monthly meeting. Their stories may sound improbable, but in Brave New Work you'll learn exactly how they and other organizations are inventing a smarter, healthier, and more effective way to work. Not through top down mandates, but through a groundswell of autonomy, trust, and transparency. Whether you lead a team of ten or ten thousand,
