We are living in a world where the ancient concept of 'only change is constant' still rules - perhaps nowhere is this more important than in the world of computers. Add to this the necessity to keep our businesses functioning at an efficient level of productivity, and you have a major requirement for computer expertise on demand. In fact, hiring the wrong computer expert or consultant in business, however well intended, can easily spell disaster. That's why our Celebrity Experts(r) wish to share this book with you. They have specific areas of knowledge and expertise they have used to analyze situations and advise their clients. They have extensive proven experience and education in integrating, implementing and changing systems. They discuss how to blend operators, equipment and systems, as well as explore disaster recovery systems and the 'Cloud.' Choosing a consultant becomes a decision that relies on that person or group to quickly, accurately and competently manage system implementation or change. The Celebrity Experts(r) in this book have the expertise and experience that can guide you. They wish to share their knowledge with you. That's what Celebrity Experts(r) ar

Since 1995, the DoD's business systems modernization program has been designated as high risk, and it continues to do so today. To assist in addressing DoD's business system modernization challenges, the Nat. Defense Authorization Act for FY 2005 contains provisions that require the DoD to take certain actions and to annually report to its congressional committees on these actions. This is an annual review of DoD's actions to comply with key aspects in the Act and related fed. guidance. To do so, the auditor reviewed, for ex., the latest version of DoD's business enterprise architecture and transition plan, investment mgmt. policies and procedures, and information in the dep't. business system data repositories. Includes recommendations. Illus.

The next generation of Business Process Management (BPM) methods and tools will support the development of a new generation of service-enabled applications that change and evolve over time. The trend is moving from relatively stable, organization-specific applications to dynamic ones supporting business processes. This book is an outcome of the International Workshop on Business System Management and Engineering (BSME 2010), held in Malaga, Spain, in June/July 2010, in conjunction with the TOOLS 2010 federated conferences and under the aegis of the EU Network of Excellence on Service Software and Systems (S-Cube). The goal of the workshop was to bring together experts in the fields of business process management, service-oriented architectures, and service security to discuss the current state of research and identify new issues, challenges, and research directions. The results of these discussions are reflected in this book.

CH2M HILL Hanford Group, Inc. (CHG) is currently performing many core business functions including, but not limited to, work control, planning, scheduling, cost estimating, procurement, training, and human resources. Other core business functions are managed by or dependent on Project Hanford Management Contractors including, but not limited to, payroll, benefits and pension administration, inventory control, accounts payable, and records management. In addition, CHG has business relationships with its parent company CH2M HILL, U.S. Department of Energy, Office of River Protection and other River Protection Project contractors, government agencies, and vendors. The Business Systems Planning (BSP) Project, under the sponsorship of the CH2M HILL Hanford Group, Inc. Chief Information Officer (CIO), have recommended information system solutions that will support CHG business areas. The Preliminary System Design was developed using the recommendations from the Alternatives Analysis, RFP-6499, Rev 0 and will become the design base for any follow-on implementation projects. The Preliminary System Design will present a high-level system design, providing a high-level overview of the Commercial-Off-The-Shelf (COTS) modules and identify internal and external relationships. This document will not define data structures, user interface components (screens, reports, menus, etc.), business rules or processes. These in-depth activities will be accomplished at implementation planning time.
