Larvicidal Activity of Some Botanical Extracts, Commercial Insecticides The Open Toxinology Journal, 2011, Volume 4 3 water containing the tested substance Preliminary tests were carried out at 100 and 1000 ppm to exclude extracts of no observed toxicity, especially at the higher concentration

Larvicidal Activity Of Some Botanical Extracts Commercial

Abstract. A botanical natural product, AkseBio2, was evaluated for its larvicidal effect against Culex pipiens under laboratory conditions. The product exhibited strong larvicidal activity and caused >90% mortalities in both the young (first-second) and the older (third-fourth) larval stages of the species at 24 h at the doses of 25 and 50 ppm. However, it was determined that the young larval stages were more susceptible to the product in comparison with the older larval stages.

Larvicidal Activity Of Some Botanical Extracts Commercial

Larvicidal and ovicidal activity of crude hexane, ethyl acetate, benzene, chloroform and methanol extracts of the leaf of three plants, Eclipta alba (E. alba), Cardiospermum halicacabum (C. halcacabum), and Andrographis paniculata (A. paniculata), were tested against the early third instar larvae of An. stephensi, the highest larval mortality was found in methanol extract of A. paniculata, E. alba and C. halicacabum against the larvae of An. stephensi (LC 50 =79.68, 112.56 and 133.01 ppm; LC ...

Ovicidal and repellent activities of botanical extracts ...

The larvicidal activity of the studied plants against the larva of C. quinquefasciatus as follows D. foveolatum chloroform extract with LC 50 = 277.03 mg/ml > L. uniflora (LC 50 = 300.56 mg/ml) > M. trichocarpa (LC 50 = 306.60 mg/ml) > P. triflorum (LC 50 318.42 mg/ml) at 24 h.

Larvicidal activity of some medicinal plant extracts ...

(Sapindaceae) also showed larvicidal activity against A. aegypti larvae (Silva et al. 2004). These phytochemicals are responsible for the insecticidal efficacy of the ethyl acetate fraction of A. blancoi against A. aegypti larva and ova. Studies have also been made regarding the insecticidal activity of other Artocarpus species.

Larvicidal and ovicidal activities of Artocarpus blancoi ...

Larvicidal effects were found for Canarium schweinfurthii Engl, Lippia multiflora Moldenke and Annona senegalensis Pers with LC50 values of 2.0, 25.1 and 30.2 mg/l respectively. A chemical screening was done on these active plants indicating the presence of alkaloids and polyphenols probable responsible of this activity.

Larvicidal Activity of Some Congolese Plant Extracts ...

All the plant extracts were found to have potential larvicidal activities against 3rd instar An. arabiensis larvae. Methanol crude extract of Calpurnia aurea achieved 100% larval mortality at 300 ppm with LC50 of 84.85 ppm while less activity was observed for methanol crude extract of Artemisia annua, 68% larval mortality at 300 ppm.
